

## HHT INTERNATIONAL'S MDFLOW, EHR AND PATIENT CARE WORKFLOW MANAGEMENT SYSTEM RECEIVES ONC-ATCB CERTIFICATION BY DRUMMOND GROUP

(Nov 12, 2010, Coral Gables, Florida) -- HHT International Consulting, Inc. proudly announces that its EHR (electronic health record) and Patient Care Workflow Management System, "MDFlow", version 3.0 has achieved the milestone of receiving ONC-ATCB Certification by Drummond Group (Certification number: ONC-ATCB EHR. 11122010-3001-8). This means that the EHR software is capable of enabling healthcare providers to meet the Stage One meaningful use measures required to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Tested and certified under the Drummond Group's Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the EHR software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

"This is an important accomplishment for our company. As a part of our commitment of providing state of the art technology and quality services, we can now confidently partner with healthcare providers in their quest to achieve meaningful use and qualify for incentive funds under ARRA. We not only provide our physicians with a certified EHR system, but we also assist our physicians in demonstrating meaningful use of health care information technology." says Harold Tong, President of HHT.

Drummond Group's ONC-ATCB 2011/2012 certification program tests and certifies that EHRs meet the meaningful use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology -- a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

MDFlow system, which met the requirements for ONC-ATCB Certification by Drummond Group, is an innovative internet-based Electronic Health Records (EHR) and Patient Care Workflow Management System. It is designed to help practices to streamline and enhance the flow of information throughout the patient's medical care lifecycle. All the medical information of the patient is accurately recorded and electronically stored in MDFlow. Healthcare providers may access patient's medical information from office, home, hospital, or from multiple offices using any computer via secured internet connection at anytime. With MDFlow, medical practices can "go paperless" and consequently save the costs of chart pulls as well as the time looking for lost charts. MDFlow offers a winning combination of cost

reduction, operational efficiency and revenue enhancement, as well as increase patient's safety and satisfaction.

"The need for EHRs in the United States healthcare system has been acknowledged for many years. Drummond Group is proud to work with leading healthcare vendors and help them offer certified technologies to health providers across the country. With more than ten years of software testing experience carried out in several industries, we are confident in our ability to offer an effective and cost-efficient testing process to the healthcare industry," says Rik Drummond, CEO of the Drummond Group. "The snowball effect could mean great things for clinical care in our country. We can help IT vendors certify their EHR systems – vendors can then help providers implement the EHR solutions to achieve meaningful use and receive incentive funds – and ultimately providers can leverage the systems to improve clinical care across the nation."

*MDFlow is 2011/2012 compliant and has been certified by Drummond Group, an ONC-ATCB approved to certify any complete or modular EHR both ambulatory and inpatient, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments." Vendor name, Date Certified, Product Version, Certification ID number, Clinical Quality Measures Certified, any additional software relied upon to certify, where applicable the certification criteria to which each EHR modules has been tested and certified.*

### **About HHT International**

HHT International Consulting, Inc. is a premier healthcare information technology solution provider. We specialize in providing the health care industry with comprehensive, strategic, cost effective and high quality information management systems and solutions. We develop, market, integrate, and support healthcare information systems that optimize the workflow and dramatically improve the efficiency and quality of healthcare delivery systems. Our clients range from single-doctor practices to major managed care organizations. For more information, please go to [www.mdflow.com](http://www.mdflow.com) to set up a live demo today.

### **About Drummond Group**

Drummond Group Inc., the trusted software test lab, provides effective and efficient electronic health record (EHR) testing to healthcare information technology vendors. As an Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB), Drummond Group works closely with healthcare software vendors to certify EHRs for use by providers that are looking to qualify for incentive funds under the American Recovery and Reinvestment Act (ARRA). Drummond Group is approved to certify both complete and modular EHR for both ambulatory and inpatient. Leveraging more than a decade's worth of interoperability, conformance testing and certification experience in multiple industries, Drummond Group delivers what's needed in healthcare: highly reliable and readily affordable software testing services.
